Which are the most frequent bottlenecks in the laboratory workflow? How to process fatty tissue and avoid under- or over-fixation? These are some of the frequently asked questions that we usually receive from our clients and prospects.

Join our Live Webinar "**Frequently Asked Questions on Tissue Processing**" on 10 May 2023 and **learn valuable solutions** to answer these and further questions, **to improve your processing.**

Through live webcams, our Application Specialist will discuss the most common aspects of tissue processing. We will analyze today's challenges of the processing step, focusing on **sample and thickness type**; we will investigate the **impact of fixation** on the quality of the results and see how lean procedures and automation can **overcome the bottlenecks in the lab routine.**
